

NEW CONTROL MODULES

VISIOLON ELV-T

SBM answers to its market changes and has developed a new control module for the heating of poultry houses.

This new control module includes new settings and has an overall improved display.

*For the **semi-automatic** range (ZRFS, XLS, HPS) and **automatic** range (ZRFA and XLA):*

TEMPO

SUNMASTER

SUNMASTER SAT

VISIOLON Elv-T

*The new control module also incorporates two 0-10 V inputs which can be directly **connected to a poultry house computer** for the regulation of heaters with automatic ignition.*

The new added features to the control module:

- ✓ Possibility to be directly connected to a poultry house computer thanks to 0-10 V inputs
- ✓ Possibility of regulating 2 heating zones per module = reduction of installation costs
- ✓ Possibility to control progressive gas regulator per heating zone through the 2 programmable 0/10 V outputs
- ✓ Ergonomic and graphic screen
- ✓ Faster cable-laying with removable terminal blocks
- ✓ TNC temperature sensor (market standard)
- ✓ Many customized options (pre-heating, time between 2 re-ignitions, ignition time, zone activation,...)
